# Users of NEKO™ ACTIVE

active  
sports

It is important to maintain gentle approach to skin hygiene, and one will only be able to take shower in a few hours.

Hot and steamed skin needs gentle cleansing of sweat.

hiking

During outdoor activities, skin requires throughout at the same time especially careful and gentle cleansing.

In the open air, the skin "dries up" and it is important to provide natural hydration

child  
care

Going out for a walk with children is a pleasure, especially when the child can be conveniently cleaned right in the playground or park.

Children's skin is especially sensitive to hygiene products.

# NEKO™ *ACTIVE* for fresh & clean skin

Ingredients	Skin effect
Disodium EDTA	The component has a cleansing effect, does not irritate the skin, conditions and has an antistatic effect
Dimethicon	The ingredient fills the space between the hardened flakes of the epidermis and forms a barrier on the skin to maintain hydration
Sodium Lauroyl Sarcosinate	Is a new generation component providing deep cleansing.
Cetylpyridinium Chloride	The component has antimicrobial, antifungal, antiviral effect
PEG-40 Hydrogenated Castor Oil	The natural component restores the natural moisture level of the skin, softens the skin and has an anti-seborrheic effect.
Vitamin E	Among the most important vitamins, improves the skin's ability to keep moisture and absorb oxygen, stimulates blood circulation in the skin
Phenoxyethanol	Antiseptic with bactericidal effect.
Cucumber water	The herbal extract improves skin healing and water-lipid metabolism; refreshes skin, increases its tone
Aloe Vera leaf extract	A herbal extract with a variety of biological effects — from the healing of tissues and wounds to the active antibacterial effect. The polysaccharide foil attracts water molecules at the same time preventing the evaporation of moisture.
